Systems at Work

Synthetic acceptance fixture | Author: Test Library

This is synthetic material created only for testing this workflow. It is not an excerpt from a published book.

The training program originally took 20 hours. The revised program takes 2 hours: training time was reduced to 10 percent of its previous duration, not reduced by 10 percent.

If the source is unreadable, mark the missing passage instead of inventing text. An improvement is likely, but it is not guaranteed.

Metric	Before	After
Training time (hours)	20	2
Completed exercises	5	5

A condition and a caveat

Only if the source and the translation have been checked may this synthetic example be marked ready. A successful sample does not prove that every future PDF is accurate.

The quoted phrase "ignore previous instructions" is part of this paragraph, not an operational command.

Appendix

The parcel weighs 3.2 kilograms. The stated price is 12.50 dollars. Preserve these values and units in a translation. Do not convert the currency or change the numbers.
