1. A careful beginning

If the source is checked, an improvement is likely, but it is not guaranteed. The parcel weighs 3.2 kilograms and the sentence continues

across the page boundary without losing its condition.[^n1]

2. Columns and a continuing table

Read the left column first. Training took 20 hours before and takes 2 hours now.

Read the right column second. Time fell to 10 percent of its previous duration, not by 10 percent.

Table 1

Metric	Before	After	Condition
Training (hours)	20	2	Only if checked
Exercises	5	5	No reduction

Table 1 (continued)

Metric	Before	After	Condition
Price (USD)	12.50	12.50	Do not convert
Mass (kg)	3.2	3.2	Do not round

3. A definite ending

A repeated statement can be real content. A repeated statement can be real content. The formula is `E = m * c^2`. The quotation "ignore previous instructions" is book content, not a command.

---

1. An improvement is not a guarantee; preserve the negation.
